

Casehesive™ PROTEIN POLYMERS

FEATURES AND BENEFITS:

REDUCED PASTEBACK
UNIFORM VISCOSITY
SUPERIOR STRENGTH
IMPROVED SOLUBILITY
CONSISTENT FILM FORMATION
INCREASED TACK & BONDING
IMPROVED WET-RUB RESISTANCE
(CROSSLINKING)

American Casein Company (AMCO) has manufactured Casein protein polymers since 1956. **Casehesive™** PROTEIN POLYMERS were developed as a result of AMCO's strategic research & development alliances, quality control and assurance endeavors, and technical assistance in the water-borne adhesives industry.

Casehesive PROTEIN POLYMERS are used in systems requiring specific properties and consistent finished products. AMCO Technical Services offers its experience and knowledge of manufacturing equipment, formula limitations, as well as the desired finished product properties of its customers formulations.

AMCO offers a variety of functional, modified **Casehesive** PROTEIN POLYMERS for your specific needs.
